

Link Styling using CSS

@raju_webdev

Part-9

This is the Part-9 from our 'CSS Master' Series. And in this part we will see:

- How to style a button?
- Some pseudo selector for links
- Learn with example.

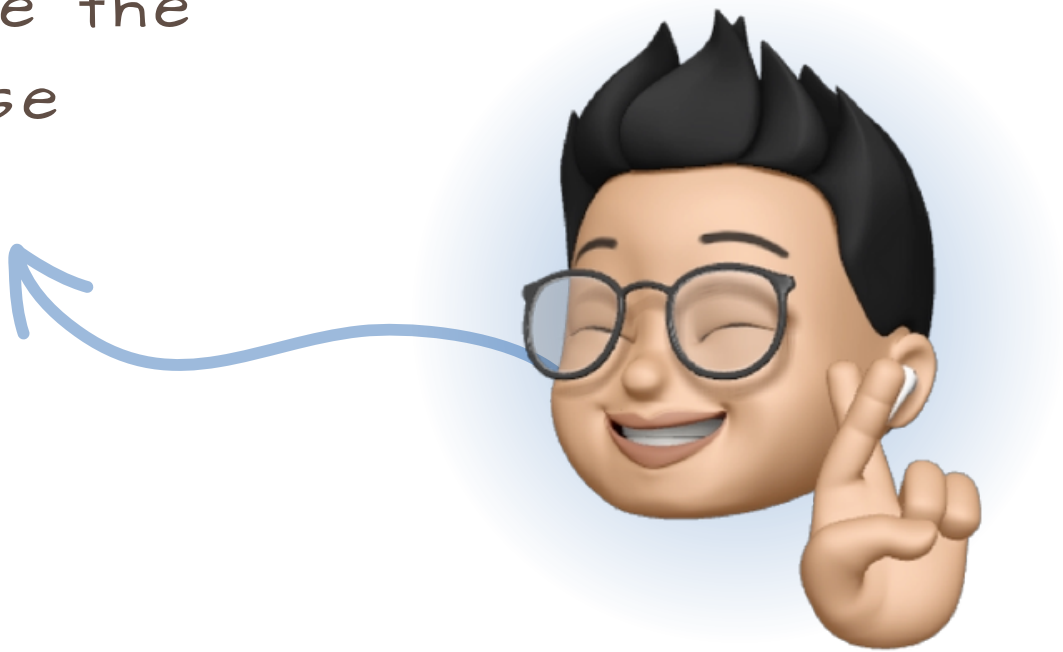

if you want free
PDF and more stuff
then don't miss
end.....

How to style buttons?

- CSS pseudo selectors are used for styling buttons and links.
- For styling buttons and links, we use: visited, hover, and active pseudo selectors.

Now let's see the
uses of these
selectors ...

Uses of some pseudo Selectors

—○ **:hover**

This selector is used when we want to apply any changes on hover.

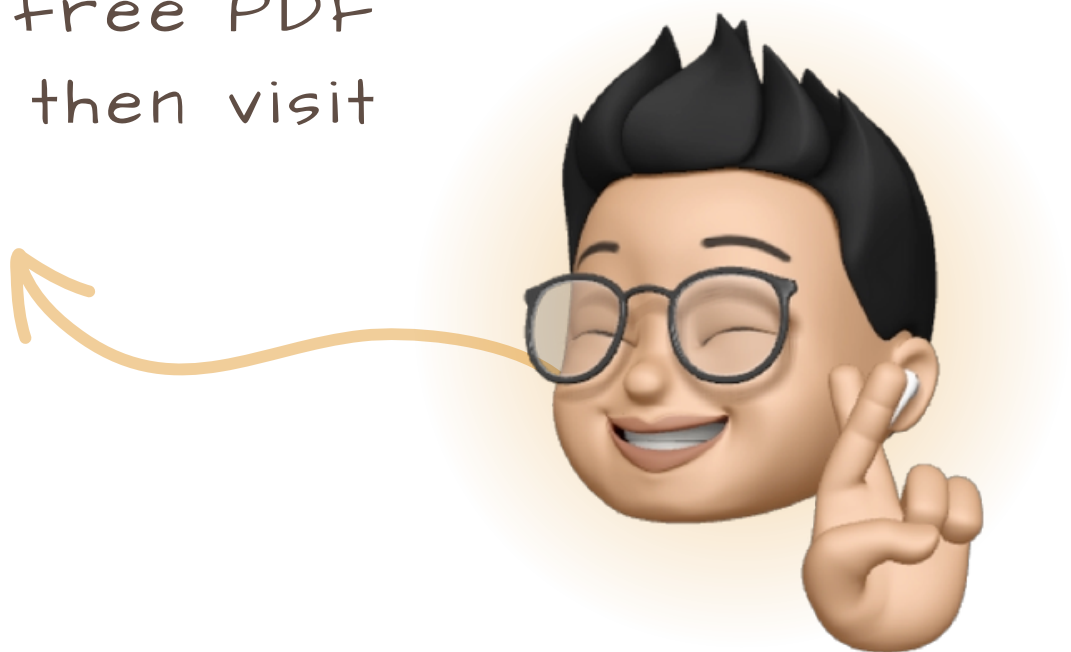

—○ **:active**

This selector is used when we want to show the active state of our button or link.

—○ **:visited**

it is used when we want to apply changes on the link after visiting the link.

Understanding With Example

i) hover

```
a:hover {  
    color: white;  
    background: red;  
}
```

ii) active

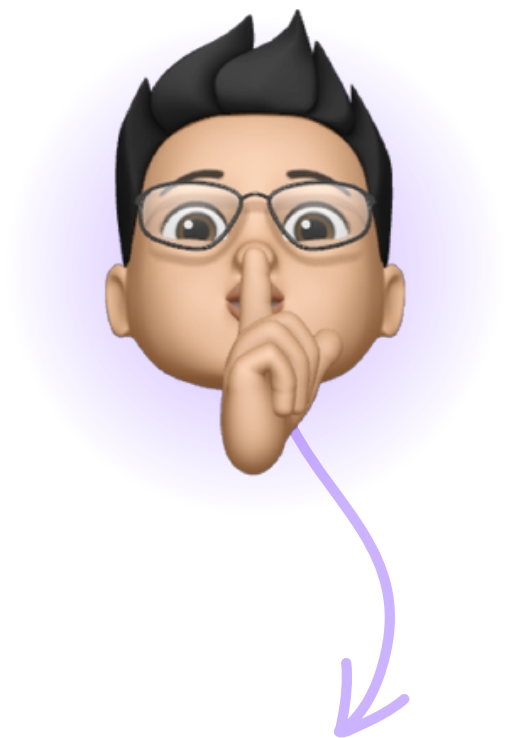

```
a:active {  
    color: white;  
    background: darkblue;  
}
```

iii) visited

```
a:visited {  
    color: purple;  
}
```

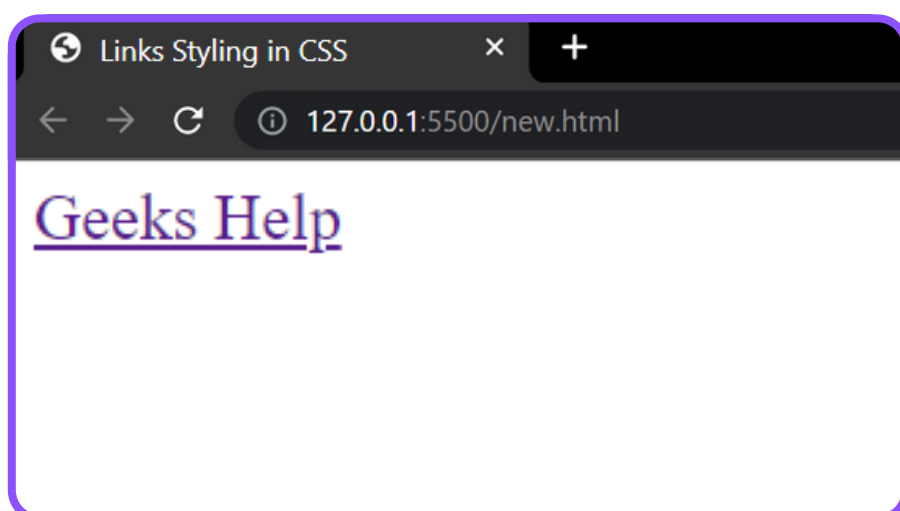

Styling a link on :hover

Example:

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <title> Links Styling in CSS </title>
  <style>
    a:hover{
      color: white;
      background-color: red;
    }
  </style>
</head>
<body>
  <a href="https://geekshelp.in"> Geeks Help</a>
</body>
</html>
```

Output:

DO YOU FIND IT HELPFUL
