Font & Text Properties

- Font properties are used to add different styles on the fonts.
- Font properties are used to change the style, size, weight, etc. of the font.
- Font styling adds a good impact on the readers, that's why we use different font styling properties.
- Text properties are used to format text styles.

let's see these
one by one...

Different font-properties

—○ font-family

font-family property is used to specify the font of a text.

```
.p {  
  font-family: 'sans-serif', 'Ubuntu';  
}
```

—○ font-size

font-size property is used to specify the size of text.

```
.p {  
  font-size: 20px;  
}
```

—○ font-weight

font-weight property set, how bold or thin character in the text should be displayed.

```
.p {  
  font-weight: bold;  
}
```

—○ **line-height**

The line-height property specifies the space between the fonts.

```
• • •  
.p{  
  line-height: 1.8em;  
}
```

Different text-properties

—○ **color**

color property is used to set the color of the text.

```
• • •  
.p{  
  color: purple;  
}
```

—○ **background-color**

This property is used to set the background-color on the text.

```
• • •  
.p {  
  background-color: lightgrey;  
}
```

—○ **text-align**

text-align property is used to set the alignment of a text. We can align a text in left, right, center, and justify.

```
.p {  
  text-align: center;  
}
```

—○ **text-transform**

text-transform property is used to specify uppercase and lowercase, and capitalize letters in a text.

```
.p {  
  text-transform: uppercase;  
}
```

—○ **text-decoration**

text-decoration properties are used to decorate text in one declaration.

```
.p {  
  text-decoration: underline;  
}
```

— word-spacing

word-spacing property is used to specify the space between the words in a text.

```
.p {  
  word-spacing: 50px;  
}
```

— text-shadow

text-shadow property is used to add the the shadow effect to the text

```
.p {  
  text-shadow: 2px 2px purple;  
}
```

— letter-spacing

letter-spacing property is used to specify the space between the characters in a text.

```
.p {  
  letter-spacing: 20px;  
}
```
