What is box-model?

- Box Model is just like a box that wraps around every HTML element.
- A box model contains content, padding, border and margins.

Now let's understand these concepts in details...

Understanding Box Model

- **content**

It is the actual content which includes: text, images

- **padding**

Creates the space around the content.

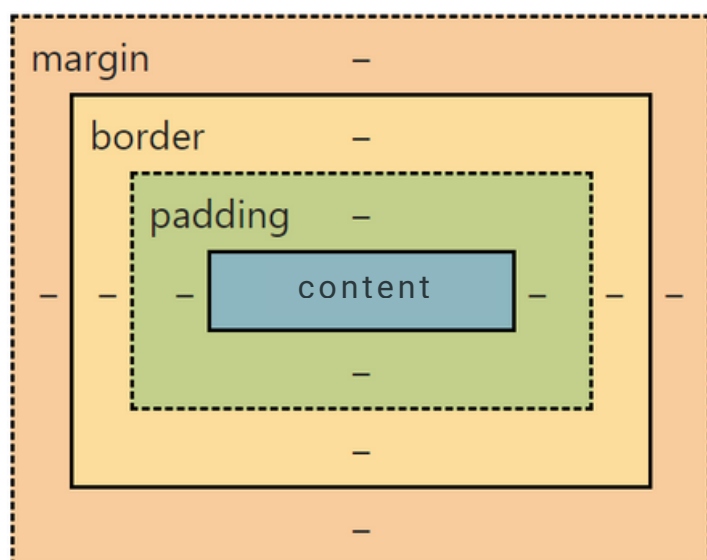

- **border**

Border area where the content's border will be set.

- **margin**

Creates the space around the content border.

How actually box-model looks

Understanding With Example

Example:

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <title> Box Model in CSS </title>
  <style>
    .myBox {
      width: 200;
      border: 4px solid skyblue;
      padding: 20px;
      margin: 20px;
    }
  </style>
</head>

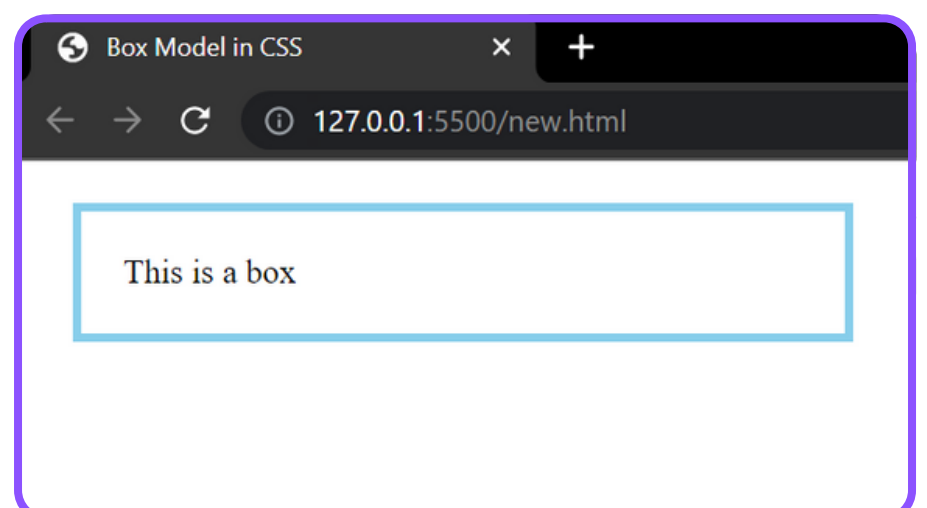

<body>
  <div class="myBox"> This is a box </div>

</body>
</html>
```
